MARLIES ADRIAANSE

Organic structures, spatial constructions, urban building works or processes of manufacturing are sources of inspiration for my work. Working with transparent scale-models and playing with scale, offers space, literally and figuratively, for new insights. Sculptures and site-specific installations, originate from an experimental attitude towards materials and techniques. The installations made in 2018 are made with a slide painting technique on paper. Video works can be made as an independent work, like the stop-motion animation 'Settlement, unsettle, reset...' (2013), or be used as part of an installation as in 'Twisted Frame' (2014).
