ONNO DIRKER

My work starts from an analytical and conceptual approach. Sense of place lies at the heart of my work. Any landscape is formed by a myriad of layers, whether they are cultural or economic, physical or metaphysical. Beside research, publications, film, performances, installations and exhibitions, work is realized in the form of eg sculptures, monuments, landscape design, gardens and parks. In 2003, together with the artist Rudy Luytjens I formed Atelier Veldwerk, to investigate the concept of public space within the context of the visual arts. Doing research from a cultural perspective without establishing criteria or predefined guidelines results into a method that could be described as 'the unfocused gaze'.
