

SIMONE VAN DEN HEUVEL

paintings and 3D art inspired by deserted or hardly accessible areas

Simone van den Heuvel: "Spatial work: large installations with sound and image, inspired at industrial locations, night-time atmospheres. Light, projections, also in public space. The interaction between nature and culture, inside and outside.

Painting: paintings, oil paint, made at industrial locations such as building sites, an engine room of a container ship. Nightly atmospheres. Also in remote areas such as the desert (Sahara). These places are either entirely created by man, where nature has obviously been put to the test or they are - inadvertently - "forgotten" places, where nature can take its course; places of human creation or of "non-creation".
