## HEIN VAN LIEMPD

Classic atemporal photography of portraits, landscapes and scenery.

In my autonomous work I prefer mostly using the poetic qualities of blackandwhite photography, although lately I also use colour more often. Landscapes, portraits and street scenery, often while travelling. In the landscapes I look for the atemporal aspects of a given situation, and make them stand out. Also in my portraits I choose a classic approach with seemingly natural light and conscious postures. That deliberately concentrated way of working tends to radiate meditational qualities. The assignment works are mostly colour with digital editing to get the best results. Besides in advertising and industry I mostly work for designers and artists to document their work.
