FERENC MOLNAR

Ferenc Molnar: I work in assignments as well as on self initiated projects. My assignments are mainly portraits from the performing arts: bands, singer song writers, designers and photographers. I have a strong fascination with meeting and photographing artists without their mask they wear on stage, so I challenge them to reveal a hidden authentic self. Besides portraits I work on long term, researched based projects (urban landscapes) that are visual explorations of our paradoxical relationship with nature in the context of the urban environment.
