

GRACE WYCHOWANSKA

My works are geometric and constructive where architecture and 4 dimension are aspects of my work. Time and Space – there is where she tries to find her answers. Her personal recollections of events and situations are to be found in her collages, drawings, paintings and photographic work. Colors and shapes which make her think of some event become two dimensional forms in her compositions and sometimes change proportions and density. Grace Wychowanska's works are geometric in character. Constructivism, Minimalism and Concrete Art are the sources of inspiration. There are two important themes that are to be found in her work: architecture and the fourth dimension.
