TINEKE PORCK

In my work I feel connected to constructivism, minimalism and conceptual art.
My work is related to constructivism and concrete art. It is linked to minimal art and zero-art. My visual language is based on constructive elements: line, point, plane. Although numerical proportions, horizontality and verticality play an important role, pure mathematics in itself is not the issue. Interconnection and structure are the essence. In my work I value intuition and personal touch. Starting of as 3-dimensional worker, i made a switch to 2-dimensional work around 2000
