## TINEKE PORCK

art is to bring back to basis what has been piled up

My work is related to constructivism and concrete art. It is linked to minimal art and zero-art. My visual language is based on constructive elements: line, point, plane. Although numerical proportions, horizontality and verticality play an important role, pure mathematics in itself is not the issue. Interconnection and structure are the essence. In my work I value intuition and personal touch. Starting of as 3-dimensional worker, i made a switch to 2-dimensional work around 2000
